EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeong Lee on 6/10/08.

The application has been amended as follows:

For claim 1:

in line 4, delete "said top edges having a plurality of recesses therein";

in lines 5-7, delete "the side walls having an inner surface having a first height and a second height at the recesses, the second height being less than the first height,";

in lines 10-13, replace " a feeder assembly having a plurality of flanges, the flanges received in at least some of the recesses in the side walls of the cage bottom, the feeder assembly constructed and arranged to make food and/or fluids available to animals housed in the cage bottom" with ---a feeder assembly having a flange, a frame, and at least one support descending from said frame; a pair of flanges extending from said frame to contact the side wall top edges to support said frame within said cage, said at least one support having an open lower end and further comprising a snap on bottom, said snap on bottom being selectively connected to said lower end of said at least one support; a cage bottom for housing an animal, the cage bottom being

constructed and arranged to receive the flange of the feeder assembly to support the feeder assembly with respect to the cage bottom, the cage bottom and feeder assembly working together to provide food and water to animals of different sizes.---

For claim 3:

in lines 7-9, delete "the side walls having an inner surface having a first height and a second height at the recesses, the second height being less than the first height, the cage having";

in line 15, after "bottom" insert ---a feeder assembly also including a frame, and at least one support descending from said frame; a pair of flanges extending from said frame to support said frame within said cage, said at least one support having an open lower end and further comprising a snap on bottom, said snap on bottom being selectively connected to said lower end of said at least one support.---

For claim 8:

in lines 9-10, delete " the side walls having an inner surface having a first height and a second height at the recesses, the second height being less than the first height;"

in line 16, after "bottom" insert ---a feeder assembly also including a frame, and at least one support descending from said frame; a pair of flanges extending from said frame to support said frame within said cage, said at least one support having an open lower end and further comprising a snap on bottom, said snap on bottom being selectively connected to said lower end of said at least one support.---

For claim 9:

in lines 8-10, delete “the side walls having an inner surface having a first height and a second height at the recesses, the second height being less than the first height”;

Allowable Subject Matter

2. With the changes as stated above in the Examiner's amendment, claims 1-3,8-19 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose or render obvious a cage assembly as described in detail, especially the feature of a feeder assembly also including a frame, and at least one support descending from said frame; a pair of flanges extending from said frame to support said frame within said cage, said at least one support having an open lower end and further comprising a snap on bottom, said snap on bottom being selectively connected to said lower end of said at least one support..
